**T** CHEM-TECH

## **XP SERIES**

The *Chem-Tech XP Series* with peristaltic technology delivers worry-free dosing in a modern design. Each and every component of the *XP Series* is designed and manufactured for optimum reliability and durability for *REAL Performance*.

The electronic timing circuit in the adjustable 'A' Models provides *reliable* pump control, without relying on mechanical adjustment components that wear out over time.

The intuitive interface and controls provide *easy* operation and the peristaltic design is virtually maintenance-free.

Tailor-made for the water conditioning market, the *XP Series* offer *affordable* solutions in both initial cost and operation.

A rugged gear train and computer-aided peristaltic design ensure *long-lasting* performance.

Fixed Models - Simple and straight-forward fixed-

rate pumps for applications where economy and ease-of-use are required. With 5 tube sizes to choose from, the F Models can deliver up to 80 USgpd and pressures up to 125 psi.

*Adjustable Models* – Built upon the solid F Model platform, the A Models incorporate an electronic timer module to provide a 20:1 turndown control for enhanced flexibility.

*Pulse Input Models* – These pumps feature an internal timer which accepts pulses from a contacting head water meter. They are adjustable to run the pumps from .1 to 1 second, .2 to 10 seconds or from 1.0 to 60 seconds per pulse.

*Flow Switch Activated Models* – This model is activated when the flow rate through the included 3/4" NPT flow switch reaches 1 GPM. The pump is deactivated when the flow rate is less than 1 GPM.

*Dry Contact Input Models* – The pump activates upon closure of a dry contact switch, and deactivates when opened. The pump is equipped with a 6' lead for connection to the switch, supplied by the customer.

*Tubing Materials* – Our standard Norprene tube material is available in Low Pressure ratings which offer extended tubing life, and High Pressure ratings to meet demanding system requirements. The optional Fluran material tubing offers greater chemical resistance; contact Technical Service for compatibility.

**Duplex Head Models** – These models utilize two pump heads to deliver twice the flow, or the rated flow of two different chemicals simultaneously.
